GENTLEMEN'S FASHIONS FOR FEBRUARY. The New York "Mirror of Fashion" is illustrated with three figures, displaying the February fashions of gentlemen's clonks sacks, fruck-coats, dress-coats, waist-coats, and the rest of the attire of a gentleman.

OPERA CLOAK.- The short circular cloak prevails, for wear at the opera. It is madified from the antiquated type, and extends to the knee; and the collar-which is quite murow-turns over to the seam, to give the same effect to the figure of the wearer, as a collarless cloak, with the addition of a finish by surmounting it with a collar, which does not detract from the symmetry of the person. The collar is of velvet, the edges of braid, and the lining is of silk serge with interlining and washiing, or of red or blue cashmere without wadding. The favorite color is blue,

SACK SUBTOURS .- Drab, and without cutting it across the waist, it takes the form of the custom, without fitting him too classly. The lapel and collar are nearly as delicate as those of a frock coat, and it is perleatly plain behind, with merely a vent in the back seam at the bottom of nine inches to layor its use for those who ride on horseback. The edges are bound with light braid or galoon, and the cuffs are round and shallow. The stand-up collar is only an inch high, which with the lapel are made ins light us possible. The collar is of velvet us are those of all coats of fancy colors.

" The Twines."-This is merely a straight single breasted sack, made as light as possible, with edges of wide braid. The sleeve at the wrist is shaped in the spoon style, and is made of dark green cloth, The. linings are put in plainly, with interlining, and wadding for those to be worn for comfort in winter.

FROCK COAT. - This parmanent content spring in the skirt, but no folness at the waist. It is made large and to close easily all the way up, with from 5 to 6 buttocks and holes on each breast, and two holes and buttons at each oull, the corners of which are rounded. The side-seams are not quite so much curved as when last reported, and while the length of the coat is increased, that of the waist is decreased. The backs are quits narrow at the waist, and the shoulder seams are curved. In all other respects it is the same as last reported.

DRESS COAT .- This garment Is becoming much more delicate and tasteful than was its style for the past season; and while the skirt is longer, the waist is shorter, and the garment appears much more drassy.

Waisrcoar. - Bull cashmere and white Marseilles, made in the roll collar style. Pantaloons,—are not so large, not so

THE DAILY NEWS.

Newport:

FRIDAY, FEBRUARY 4, 1818.

BY O. F. JACKSON, 97-THAMES ST

Mr-Advertisers will please bear in mind that the circulation of the DAILY NEWS is more than DOUBLE that of the Daily Herald, and greater than the combined cir-culation of the Daily and Weekly Herald. As one proof of this fact, the list of Letters remaining in the Post-Office is a tvertised in the NEWS, as BY LAWREQUIRED.

FEBRUARY .- The origin of the names of the months in the year is quite interesting. February corresponds to Adar, (Exra 9; 15.) the sixth civil, and twelfth sacred month of the Jews. By the Saxons, it was called Solm each, i.e. the Sun-month, from the evident increase to the length of the day. Numa gave February twenty-nine days, but Augustus reduced it to twenty-eight, and added another day to his own month of August. The Rom as gave this month the name which it now bears, in bonor of their god Juno, who was sometimes called Februa, Februaca or Februalis, from the Latin februo I purify. It was during the month of February that funeral Justrations were performed at Rome, and in connexion therewith sacrifices were offered to Juno. These lustrations and sacrifices lasted for twelve days, and constituted a sort of purification from and atonoment for, the sins or the whole year.

By the Saxons, February was sometimes called "pancake month," because in the course of it, cakes were offered by their pagans to the sun.

63-Professor Graves delivers another free Lecture on Phrenology, Physiognomy and Physiology, at Franklin Hall, this evening. He is a perfect master of the science, and we will warrant that those who listen to him will be well entertained. He has spent the last twelve years, to our knowledge, in studying and Lecturing on this subject, and he may rightely be termed a velcran in the cause

63-Of Chase's Bank Lock the Scientific American says :-

The most perfectly secure and efficient, unpicable, unbreakable, and unburstable lock over introduced, has been recently invented and perfected by Mr. L. S. Chase, of Lockport, N. Y. It is suspectible of 744,030,000,000,000 changes of adjustment; has no accessible aperture into which guapowder can be introduced, and could not be picked nor unlocked in seven years even by the manufacturer thereof, with the key in his possession, unless he had locked; it himself; and as to thickes, the morthey should examine and investigate this lock, by indents, impressions, or otherwise, the more thy wouthoutknow how to open it.

TEN Houses a Day .- A bill has been introduced into the Legislature of Pennsylvanua to regulate and abridge the hours of labor in all cotton, woollen, silk, and flax fictories in that Commonwealth, Ten house of actual labor, are to constitute a day's work; and no person is holden or required to labor more than that period. No: mirors mader the age of ten years, are allowed to work in any manufacturing establistement. Freely dullars is the penalty ugalast any employer or owner of a factory who emplays his help more ten hours per eay, or rixty hours in a secular week .--This act to go into operation on the first day of July news.

A NEW FORT IN THE NORTH WEST-The St. Lowis Republican says the United States government have resolved to establish a to the the Shark country, somewhere near the Pritish line, and in the vicinity of the Schick settlement. THE TELEGRAPH.-A great improvement ih the mode of transmitting intelligence is thus noticed in the Cincinnati Chronicle:

" We have conversed with Dr. Roe, of Illinois, who is proceeding to Washington with the model of an invention which he patches, messages or large documents are rooms, in Boston. A contemporary thinks calls the Telegraph Macipulotor. Desset up in electrical types, locked in a chase in a manner similar to printing types, and the form place i upon the machine. Dr Roe is sanguine in the belief that he can by this machine transmit to all points connected with the wire, as much matter as en at the Opera, Paris. would make one cutire page of the Chronicle in twenty minutes.

The Manapulator is represented as being remarkably simple, and not likely to get out of order. And, to secure correctness, as well as speed, a proof is taken from the types, in the ordinary manner.

IFA number of signs were blown down in Philadelphia on Sunday, by which persons were badly hurt. Mr Daniel Moore, a printer, had his leg so badly crushed that it was amputated. Mr Cyrus Holborn was knocked down senseless. Mr Mattack, a carpenter, was thrown down twenty feet from a ladder, and very severely injured.

\$3-Ir is suggested that the core of the adolierated quarter eagles, recently detected, is a mixture of platinum and silver. This perhaps will account for the just weight of the coin, platinum being heavier than gold, as silver is lighter.

CATCHING COLDS .- When you come out of a very cold atmosphere, you should not first go into a room that has a fire in it, or, if you cannot avoid that, you should keep for a considerable time at as great a distance as possible, and, above all, refrain from taking warm or strong liquors when you are cold. This role is founded upon the same principle as the treatment of any part of the body when frost-bitten. If it were brought to the fire it would soon mortily; whereas, if rubbed with snow, no conseduences follow from it. Hence, if the following rule were strictly observed, when the whole body, or any part of it is chilled, bring it to its natural feeling and warmth by degrees, the frequent colds we experience in winter would, in a great measure be prevented.—Dr Graham's Domestic Medicine.

Bogle's Hyperion Fluid; Or Vegetable Hair Composition.

THE subscriber has been induced to bring this article before the public, at the request of his numerons customers, among whom are physicians and ritizens of the first respectability, who have adopted its use in their families, and wish others to

participate in its advantages.
The Hyperion is composed of vegetable ingredients, the secret of compounding and blending which ents, the secret of compounding and octubing which is known some, y to the subscriber. It is an article in which a cleansing and purifying wash is beautifully blended with a most delicate, sifky and glossy moisture never before attained, yet free of animal grease or essential oils. It cleares the pures of the skin, causes a healthy action in the blood vessels, nerves, &c., which leed the hair, thereby preventing BALDNESS AND GREY HAIR.

It entirely frees the skin from Seurf, Dandruff, and other entaneous diseases, disposes the hair to curl, and changes the harshest hair into the gost soft, glossy, and healthy state, also imparts to the darker color, and the free use of it, both on the skin and hair, in a most healthy and luxuria. state until the latest period of life.
Lanies will find the Hyperion a gr. at addition to

the toilet, both on account of its delicale and agree-ble perfume, and the great facilities it abouts to dressing the bar, which, when most with the fir-id, can be dressed in any required form, so as to preserve its place, whether plain or in curls.— When used on children's heads, it lays the foundation of a good head of hair.

I tent for a new and heautiful cooking Range, to which they invite the attention of the public. This Range may be set in the ordinary fire place

and by a simple, though effectual apparatus, the throat of the chimney mayin an instant of time, be opened or closed, so that the heat in summer and the fumes from cooking at all times may escape

through the chimney.
Wood or cool may be used, and the evil of smoking chimneys is completely remedied by its intro-

duction.
This Range is so constructed that it takes up but a small space, and yet it contains all the qualities of those which take up double the amount; and it being constructed as it is, the Builers are brought in close proximity with the fire, and it consequest ly boils much sooner, and with a smaller amount of fuel, than the old fashioned Ranges, or cook stoves. It contains five hollers, four of which may be converted into two, by taking out, a cross piece and thus will admit of two large boilers at the wide by 21 deep, which cannot be surpassed for

The subscriber has one of these Ranges in aperation at his store, where the public are invited to call and examine it and if they will, they must at once discover its utility. He also keeps constantly on hand all kinds of Parlor, Office, and Cook Stoves, Tin Ware, &c., &c.

Dr. EMANUEL,
Dear Sir :--- You may perhaps think my statement almost incredible. My reason for fearing so is the fact of your never recommending your telly for the cure of confirmed consumption, but only in its primary or first stages. I have every reason to believe that I was in its last stage; my physician fold one se; my friends teld me so; as well did my symptoms, for they were truly alerming; and I felt felly convinced, that unless relief was obtained. I must soon be consigned to the narrow confiner of the silent grave. But by the darrow commers of the sherr grave. But by the timely use of y air remedy. I still live, and again enjoy my former good health. I had, indred, dear sir, all the alarming symptoms you speak of as forming consumption in its worst stage; but by

the use of your Jelly, I again say, I am cured. Yours, deer sir, with great sincerity, 18AAC J. BEED.

And now, reader, having given you a plain statement, let me conjure you to pause, ere it is too late; try this Balsanie Lung Jelly—try it. I have put its price to you as low as I can afford; if you use it, and succeed in coring yourself, I shall have the gratification of having rescared another from consumption; and I hope, in return, that you will iot withhold from me your name, and a statement of your cure.
